**SURFACE PHENOMENA IN HEMORHEOLOGY: THEIR THEORETICAL,
EXPERIMENTAL, AND CLINICAL ASPECTS^a***Editors and Conference Organizers*

ALFRED L. COBLEY AND GEOFFREY V. F. SEAMAN

CONTENTS

Introductory Remarks. By ALFRED L. COBLEY	ix
---	----

Part I. Theoretical

SESSION I. SURFACE FORCES IN BIOLOGICAL SYSTEMS

Membrane Interaction and Deformation. By V. A. PARSEGIAN AND R. P. RAND	1
Energetics of Membrane Deformation and Adhesion in Cell and Vesicle Aggregation. By EVAN A. EVANS AND V. ADRIAN PARSEGIAN	13
Surface Chemical Factors Presaging Bioadhesive Events. By ROBERT E. BAIER	34
Bilayer Sensor Model of Erythrocyte Shape Control. By MICHAEL P. SHEETZ AND EYTAN ALHANATY	58
The Role of Electrostatic and Structural Properties of the Cell Surface in the Energetics of Cell-Cell and Cell-Surface Interaction. By D. LERCHE	66

SESSION II. SURFACE HEMORHEOLOGY

The Role of Membrane-Bound Macromolecules and Macromolecules in Solution in Cell/Cell Encounters in Flowing Blood. By A. SILBERBERG	83
Mathematical Models for Transport across the Endothelial Cell Layer. By SHELDON WEINBAUM	92
Physical Theory of Some Interface Phenomena in Hemorheology. By SYOTEN OKA	115
Membrane Proteins in Monolayers, Multilayers, and Membranes. By MARTIN BLANK	128

^a This series of papers is the result of a conference entitled Surface Phenomena in Hemorheology: Their Theoretical, Experimental, and Clinical Aspects, which was held by The New York Academy of Sciences on October 26-29, 1982.

Theoretical Models of Rouleau Formation and Disaggregation. By RICHARD SKALAK AND SHU CHIEN	138
---	-----

Part II. Experimental

SESSION III. SURFACE PROPERTIES OF THE BLOOD CELLULAR ELEMENTS	
Surface Charge of Old, Transformed, and Experimentally Deteriorated Erythrocytes. By D. DANON, Y. MARIKOVSKY, AND H. FISCHLER	149
Structure and Function of Erythrocyte Membrane Spectrin. By VINCENT T. MARCHESI	159
Calcium Regulation of Glycoproteins IIb and IIIa in Human Platelet Membranes. By DAVID R. PHILLIPS, KINGO FUJIMURA, LISA K. JENNINGS, LESLIE PARISE, LAURENCE FITZGERALD, AND JOAN E. B. FOX	166
Electrochemical Properties of the Peripheral Zone of Erythrocytes. By GEOFFREY V. F. SEAMAN	176
Energy Balance in Red Cell Interactions. By SHU CHIEN, LANPING A. SUNG, SHLOMOH SIMCHON, MARY M. L. LEE, KUNG-MING JA I, AND RICHARD SKALAK	190
Viscous Flow of Cytoplasm and Red Cell Membrane: Membrane Recovery and Tether Contraction. By R. M. HOCHMUTH, D. A. BERK, AND H. C. WILES	207
SESSION IV. INTERACTION OF BLOOD CELLULAR ELEMENTS WITH OTHER CELLS AND WITH FOREIGN PARTICLES	
A New Membrane Concept for Viscous RBC Deformation in Shear: Spectrin Oligomer Complexes As a Bingham-Fluid in Shear and a Dense Periodic Colloidal System in Bending. By H. SCHMID-SCHÖNBEIN, R. GREBE, AND HANNELORE HEIDTMANN	225
Effects of Dextran and Polyvinylpyrrolidone on Red Cell Geometry and Membrane Elasticity. By GERARD B. NASH AND HERBERT J. MEISELMAN	255
Yield Stress in Sedimented Red Blood Cell Layers. By PERRY L. BLACK-SHEAR, JR., DANIEL C. DEETZ, CHRISTOPHER MORRIS, AND STEVEN J. KAYSER	263
Measurement of Surface Tension of Blood Cells and Proteins. By A. W. NEUMANN, D. R. ABSOLOM, D. W. FRANCIS, S. N. OMENYI, J. K. SPELT, Z. POLICOVA, C. THOMSON, W. ZINGG, AND C. J. VAN OSS	276
Shear-Induced Collisions between Human Blood Cells. By HARRY L. GOLDSMITH, KOICHI TAKAMURA, AND DAVID BELL	299
Interactions of Erythrocytes with Bacteria under Shear. By DONALD E. BROOKS, AND TREVOR J. TRUST	319
Interaction of Phagocytes with Other Blood Cells and with Pathogenic and Nonpathogenic Microbes. By C. J. VAN OSS, D. R. ABSOLOM, AND A. W. NEUMANN	332
Morphological Study of Early Phases of Platelet Adhesion to Foreign Surfaces: Effect of Calcium. By GILBERT C. WHITE, II, D. EMERSON SCARBOROUGH, AND K. M. BRINKHOUS	351

Platelet and Red Cell Involvement in Mural Thrombogenesis. By VINCENT T. TURITTO AND HARVEY J. WEISS	363
SESSION V. SURFACE PROPERTIES OF THE BLOOD VESSEL WALL	
The Endoendothelial Fibrin Lining, Fibrinogen Gel Clotting, and the Endothelium-Blood Interface. By ALFRED L. COPLEY	377
Fibrin Gels and Their Possible Implication for Surface Hemorheology in Health And Disease. By BIRGER BLOMBERG AND MASAHISA OKADA	397
Macromolecular Charge and Cellular Surface Charge in Adhesion, Ingestion, and Blood Vessel Leakage. By SATIMARU SENO, TOSHIRO ONO, AND TADASHI TSUJI	410
Surface Phenomena of Coagulation Factors <i>in Vivo</i> , Observed by Fluorescence Intravital Microscopy. By SIEGFRIED WITTE	426
Surface Properties of Pulmonary Endothelial Cells. By UNA S. RYAN AND JAMES W. RYAN	441
Vesicular Transport of Proteins by Capillary Endothelium. By STUART K. WILLIAMS	457
SESSION VI. INTERACTION OF BLOOD WITH ARTIFICIAL SURFACES EXTRA VIVUM AND <i>IN VIVO</i>	
Introductory Remarks. By LEO VROMAN	469
The Blood Interface at Artificial Surfaces within a Left Ventricular Assist System. By PEER M. PORTNER, GEORGE F. GREEN, AND NARAYAN RAMASAMY	471
Platelets Adhere Where Flow Has Left Fibrinogen on Glass. By M. F. STANFORD, P. C. MUÑOZ, AND L. VROMAN	504
The Biological Activity of Antithrombotic Agents Immobilized on Polymer Surfaces. By SUNG WAN KIM, CHARLES D. EBERT, JAMES C. MCREA, COLIN BRIGGS, SI MYUNG BYUN, AND HYUN PYO KIM	513
Requirements for Thromboresistance of Surface-Heparinized Materials. By P. OLSSON, O. LARM, R. LARSSON, L-E. LINS, E. NILSSON, AND J. SWEDENBORG	525
Thrombogenesis: Effect of Molecular Motions, Surface Order, and Hydrophobicity of the Polymer Interface. By S. A. BARENBERG, W. M. REICHERT, AND K. A. MAURITZ	538
The Relationship between Surface Charge (Potential Characteristics) of the Vascular Interface and Thrombosis. By PHILIP N. SAWYER	561
Part III. Clinical	
SESSION VII. ACTION OF PHARMACOLOGICAL AGENTS ON BLOOD CELLULAR SURFACES	
Red Cell Deformability As a Criterion of Surface Hemorheological Changes: Clinical and Pharmacological Approaches. By G. A. MARCEL, D. WEILL, E. CATRY, M. THAO-CHAN, C. GEORGE, M. GUEGUEN, F. DRIS, M. HANSS, AND D. KOUTSOURIS	585

Assessment of Pharmacological Agents with a Hemorheological Action. By JOHN A. DORMANDY AND ARPAD MATRAI	599
Action of Drugs on the Aggregation and Deformability of Red Cells: Effect of ABO Blood Groups. By L. DINTENFASS	611
Effect of Anionic Amphophiles on Erythrocyte Properties. By DONALD E. McMILLAN, NYLÉ G. UTTERBACK, AND JOSEPH J. WUJEK	633
<i>Ex Vivo</i> and <i>in Vivo</i> Evaluation of Drugs That Inhibit Platelet Function. By STEPHEN R. HANSON AND LAURENCE A. HARKER	642
Hemorheology in Cerebrovascular Diseases: Approaches to Drug Develop- ment. By FRANK J. NORDT	651
Covalent Modification of Membrane Components in the Regulation of Erythrocyte Shape. By NORBERT I. SWISLOCKI, JAMES J. KRAMER, MARY A. O'CONNELL, AND EARLENE B. CUNNINGHAM	662
 SESSION VIII. SURFACE HEMORHEOLOGY IN AGING AND DISEASE	
Cancer Cell Damage at the Vascular Endothelium. By LEONARD WEISS AND DOROTHY GLAVES	681
Biochemical and Electrostatic Considerations in Primary Platelet Aggregation. By BARRY S. COLLER	693
Fluid Dynamics As a Factor in the Localization of Atherogenesis. By ROBERT M. NEREM AND MURINA J. LEVESQUE	709
Electrochemical Properties of Platelets: Clinical and Pharmacological Applications. By J. F. STOLTZ	720
General Discussion	742
Concluding Remarks. By A. L. Copley	749
Index of Contributors	751
Subject Index	753

Major funding for this conference was provided by:

- HOECHST-ROUSSEL PHARMACEUTICALS, INC.

Financial assistance was received from:

- BOEHRINGER INGELHEIM, LTD.
- BURROUGHS WELCOME COMPANY
- E. I. DUPONT DE NEMOURS & COMPANY
- PIONEER VIGGO, INC.
- SANDOZ LTD.

The New York Academy of Sciences believes that it has a responsibility to provide an open forum for discussion of scientific questions. The positions taken by the authors of the papers that make up this *Annal* are their own and not necessarily those of The Academy. The Academy has no intent to influence legislation by providing such forums.
